Technology in Sustainable Design & Construction

15th JAN 2020

Cairo Conrad Hotel

EGCG
ENGINEERING CONSULTANTS GROUP S.A.

Organized by

Media Partner

The 7th Excellence in Engineering Forum.

is held this year under the title

Technology in Sustainable Engineering Designs.

The forum is organized by the University to work (UTW) Program in cooperation with Next Design Magazine. The Excellence in Engineering Forum is one of the activities of a university-to-work program which is one of the most important sustainable development programs that helps to achieve Egypt's Vision 2030 & goes in line with the UN Sustainable Development Goals SDGs.

The 7th version of the Excellence in Engineering Forum focuses on the importance of keeping pace with engineering companies in Egypt to digital transformation and the tremendous development in the use of technology in the work of sustainable engineering designs and in the supervision of the implementation and management of construction projects in a way that improves the quality of engineering product in the fastest time and less cost.

Taking advantage of digital transformation and technology in the field of engineering design and construction will greatly help in providing world-class engineering consulting services and help to adhere to the highest standards of quality and ethical standards beyond the expectations of customers and witnessed by everyone locally and globally. The 7th version of the Excellence in Engineering Forum will be held on January 15, 2020 at Cairo Conrad Hotel, under the patronage of Ministry of Housing, Ministry of Communication & Information Technology, Ministry of Environment, Ministry of Investment & International Cooperation, Ministry of Youth & Sports, and Ministry of Higher Education.

The proceedings from such workshops will be going to support sustainable development projects in the needy governorates of Upper Egypt.
